CORPORATE CAPABILITY STATEMENT

Core Competencies

WITS delivers world-class results with cybersecurity subject matter experts (SME's) in the following core competencies

- **Cybersecurity services:** GSA 5415 IHACS SIN; Penetration Testing; High Value Asset (HVA) protection and assessment; Risk and Vulnerability Assessments (RVA)
- **Cybersecurity Training Development and Delivery:** Cybersecurity course instructional design; In-person, online, and hybrid IT and technical course delivery; Design and implement dedicated IT infrastructure for training environments
- **Full-Service IT Expertise:** GSA 5415 IS SIN; Linux system/network engineering/admins; Microsoft Windows system engineering/administration; Tier I – III IT Help Desk services; Admins who secure what we manage

Cybersecurity

Our Cybersecurity Capabilities:

- **Unique cybersecurity experience.** WITS personnel draw on years of specialized federal government and commercial experience to bring unbeatable experience to securing your applications and networks.
- **Experienced penetration testing in complex environments.** WITS has years of experience performing advanced technical penetration testing for corporations with mixed computing platforms (Linux, Windows, etc.).
- **Proven Success in Cybersecurity Compliance Support.** WITS provided critical support to a government contractor who successfully renewed their sensitive network's authority-to-operate (ATO)
- **Application Security Analysis.** WITS has experience analyzing software and hardware for security vulnerabilities and compliance.

Cybersecurity Training

Our Technical Training Capabilities:

- **Extensive Course and Curriculum Development Success.** WITS personnel have created tailored technical training for federal government, commercial, and academic environments. WITS has created content for single day presentations and full-time training courses lasting months. Give us requirements, and WITS will produce content that delivers results.
- **SME Instructors committed to best practices.** WITS instructors are required to be subject matter experts in what they teach. They work hand-in-hand with instructional designers to optimize the learner's experience.
- **Teachers at heart.** WITS has a culture of learning and teaching, which is unusual for a technical organization. As such, WITS brings a passion to instruction that is not easily found elsewhere.

Company Data

HISTORY

WITS is a cybersecurity firm founded in 2016. WITS personnel have provided advanced penetration testing and training services to government and commercial customers with excellent results and references. WITS excels at helping its clients achieve compliance with complex security requirements, administer and secure multi-platform IT environments, and assisting customers with implementing best practices.
